

CARROT HYBRID KXPC-041

A Long Nantes Type Variety

Carrot KXPC-041 is a long Nantes type hybrid that produces very uniform and smooth roots. The roots are 7 to 8 inches long and about 1 ½ to 1 ¾ inches in diameter and cylindrical in shape.

Exterior and interior color is uniform dark orange with very small core. This variety produces strong tops with good attachment and is about 19 to 20 inches in height.

This variety produces very uniform roots with great flavor. KXPC-041 is tolerant to premature bolting.

Markets: Wherever Long Nantes varieties are needed especially for fresh bunching market due to variety's excellent uniformity and color. It also is used for slicing.
